DETAILED ACTION

Request for Continued Examination

1. The request filed on March 21, 2006 for a Request for Continued Examination (RCE) under 37 CFR 1.53(d) based on parent Application No. 10/799,056 is acceptable and a RCE has been established. An action on the RCE follows.
2. In view of amendment filed April 7, 2006, new claims 10-20 have been added. Claims 1-20 are pending.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 1713

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blatz (US 5,770,654) in view of Hedrick et al. (US 3,419,517) for the reasons adequately set forth from paragraph 3 of the office action of October 6, 2005.

Applicant's arguments filed April 7, 2006 have been fully considered but they are not persuasive. Applicants argue that the references of Blatz and Hedrick et al. are not combinable because Blatz in the claims recites "consisting essentially of" and therefore Blatz's teaching teaches away from the claimed invention and from Hedrick et al. Further, applicants argue that Blatz does not in any way suggest the amount of filler as claimed.

However, the examiner disagrees because the recited "consisting essentially of" in Blatz is a language merely for pointing out preferable embodiment of the disclosed teachings. Because the teaching of a reference is not limited to its preferable embodiment, the combination of the references to Blatz and Hedrick et al. is proper. Moreover, the examiner would like to point out that compositions of Blatz do not exclude a filler because Blatz clearly indicates that the addition of inorganic filler would not affect the basic properties of the disclosed composition when Blatz discloses that inorganic pigments are acceptable in the disclosed composition.

Applicants also argue that the combination of the references of Blatz and Hedrick is a result of a hindsight after reading applicants' disclosure. However, in response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).
